ONCE®

Asset™

Online digital asset management library, designed exclusively for the Automotive Aftermarket

Key Benefits

☐ Say goodbye to digital asset chaos

☐ Store, manage, re-size and share your images with ease

☐ Increase efficiency and accuracy through system integration

☐ Reduce resource costs and task duplication

☐ Greater control and management of branding

☐ Sophisticated reporting and analytics at your command

☐ Distribute assets compliant to pre-set criteria and multiple Aftermarket Data Standards

☐ Access from multiple locations anywhere in the world 24/7

☐ Control and share assets between departments, brands or organisations

☐ Three options available to match your business needs

Asset™ is the online repository for all your digital assets and a component of ONCE®, the complete automotive cataloguing and fulfilment solution. Upload a high resolution, master asset once, and Asset makes it possible for you to control, customise, convert and re-use that asset again and again.

Integrate Asset™ with other ONCE® components and you have a powerful product library at your fingertips, that can be managed and maintained with ease.

Maintaining an up-to-date library of digital assets is essential for business. Asset gives you the capability to do this accurately and efficiently. For example, integrate with ONCE®'s Xchecker catalogue management system and you can automate complex formatting, naming and distribution tasks. Whilst Asset and Catalogue will build you a print ready catalogue, cover-to-cover at the touch of a button.

Key Functionality

Allocate digital assets to one, or multiple part numbers

Bulk upload or download images, files and data

Create, manage and re-size assets with their relevant product and branding information
Output assets with correct criteria, in whatever format, size or resolution

Integrate with Xchecker for automatic data feeds and updates

A suite of reports to help you **manage, edit** and **enhance** your digital assets

Xchecker™
