

Unlock Greater Efficiency & Accuracy with Xchecker IV

Xchecker IV is the evolution of Xchecker III, built within the new, cloud-based ONCE® platform to provide a more efficient, automated, and intelligent way to manage your aftermarket parts data. With improved customisation, real-time updates, enhanced filtering, and powerful new tools, Xchecker IV takes data management to the next level.

Benefits of ONCE® Xchecker

Full Data Visibility
Instantly see where your data needs improvement.

Save Time
Faster performance and real-time updates eliminate delays.

Increased Accuracy
Automated validation, guided workflows, and improved data controls.

Seamless Integration
Direct delivery to TecDoc, MAM Autocat, and eCats.

More Security
Advanced access controls & tracking.

Why Upgrade to Xchecker IV?

Smarter, Faster Data Management

- Customisable dials and real-time insights drive action and improve data quality.
- Instant feedback on data changes - no waiting overnight!
- Simplified Asset management with images and documents all in one place.
- Guided workflows ensure accuracy when adding, editing, or deleting data.

Enhanced Search & Filtering

- Advanced filtering options let you work at a granular level - no need for exporting.
- Customisable grids allow you to organise and display data your way.
- Faster searches mean no more waiting for pages to load.

Flexible Data Control

- Improved Parent/Child, Supersession & Kit relationships for better visibility and control.
- Supersession control at country level for precise market management.
- Easier classification & tagging to group products and make bulk changes.

Seamless Integration & Delivery

- Instant eCat updates - no more overnight delays!
- Instant TecDoc updates via IDP to the TecDoc Catalogue.
- Automated validation & error correction for TecDoc & Autocat.
- Index restrictions help improve range coverage with ease.

Better Security & Compliance

- 2FA (two factor authentication) security for safer access.
- Country restrictions enhanced - no more manual list-building.
- User tracking & productivity insights give admins full visibility.

Enhanced Collaboration & Notifications

- New Comments system makes it easier to collaborate with team members.
- Switch between product databases without logging in and out.
- In-app notifications keep you updated - no more cluttered email inboxes.
- Tracking tools let you monitor user activity and system changes.
